Exhibition & Display Systems

L-1 System

# Base Your Exhibits on Our Wealth of Experience.

Set the right mood with an exhibition stand that reflects your company's image and matches your corporate identity. Using colours and materials that will stand the test of time, reflecting your own reliability and consistency, you can create islands of communication where people can come together, supporting your business by fostering successful and harmonious relationships.

The exhibit building system

The highly acclaimed Leitner 1 connector has proven that a classic can be open to change: the connector is constantly evolving and represents a whole world of ideas in two versions, with 45°/90° or 60°/120°.

Leitner 1 convinces through uncomplicated technology and a complete system of various components. This offer could be just right for you: individual floor plan and design possibilities with high stability and calculable costs.

The assembly, disassembly and configuration of Leitner 1 are all possible without tools. The system components are simply slotted together. Accessories for counters, booths, showcases, ceilings & lighting leave nothing to be desired.

# An Adaptable System for Customized Solutions.

*Leitner 1 never fails to impress through its quality, its ingenuity and its matchless versatility. You can even build towers-four-square, multi-sided or round - as the eye - catching heart of your stand. These high-rise reflections of your corporate aspirations can then be further enhanced by multi-level platforms, display cases and general-purpose columns, all optionally equipped with lighting for added effect.*

*Ceiling designs with integral lighting create atmosphere and can highlight important exhibits. With Leitner 1, they come in many forms, slatted, latticed, open grille or solid. If you're trying to close an important deal with a customer or just having a quiet chat, it's important to have a haven of peace and confidentiality to which you can withdraw. Which is why Leitner 1 offers you a choice of four different doors, entrances and exits.*
