L_1 System *The exhibit building system*

The highly acclaimed Leitner_1 connector has long ago proven that a classic can remain open to change: the connector is constantly evolving and represents a whole world of ideas in two versions, with 45/90deg or 60/120deg.

Leitner_1 convinces through uncomplicated technology and a complete system of various components. This offer could be just right for your individual floor plan and design possibilities with high stability and calculable costs.

Photo: Frank Erber

The assembly, disassembly and configuration of Leitner_1 are all possible without tools. The system components are simply slotted together. Comprehensive accessories for counters, booths, showcases, ceilings and lighting leave nothing to be desired.
