

L4 System

Flexible and portable

 **DUOGB** Ltd

L4 System

—The prestige presentation wall

There is hardly a company which does not need the L4 wall. It is your in-house exhibition stand: it has just the right element of flexibility and spontaneity to present both your services and your company. Or it can act as a notice-board.

It is assembled in an instant. Not in any old way, but exactly how you need it. In the foyer today, in the meeting room tomorrow, or as a notice-board in your staff common room next week. Actually, it's not a wall at all, but rather 100 walls. Or it can be more. But that's entirely up to you.

The L4 wall combines features you would also wish your staff to have: mobility, speed and flexibility - and it's always good for a surprise. And you wouldn't want to do without that, would you?

— The wall in a case

*The L4 wall comes in a stable
aluminium case on castors.*

*It can be used as a packing, filing
or transport system.*

*Alternatively, the L4 wall is also
available in two cases - splitting
the weight and making transport
easier.*

*L4 wall - one-case version
length 890 mm, width 420 mm,
height incl. rollers 795 mm
Total weight: 58 kg*

*L4 wall - two-case version
length 690 mm, width 320 mm,
height incl. rollers 795 mm
Total weight: 38 kg + 31 kg*

— The wall in a bag

The padded bag version of the L4 wall is not only lighter in overall weight. As the contents are split over five bags, each bag only weighs max. 11 kg. This means they are also transportable in any car.

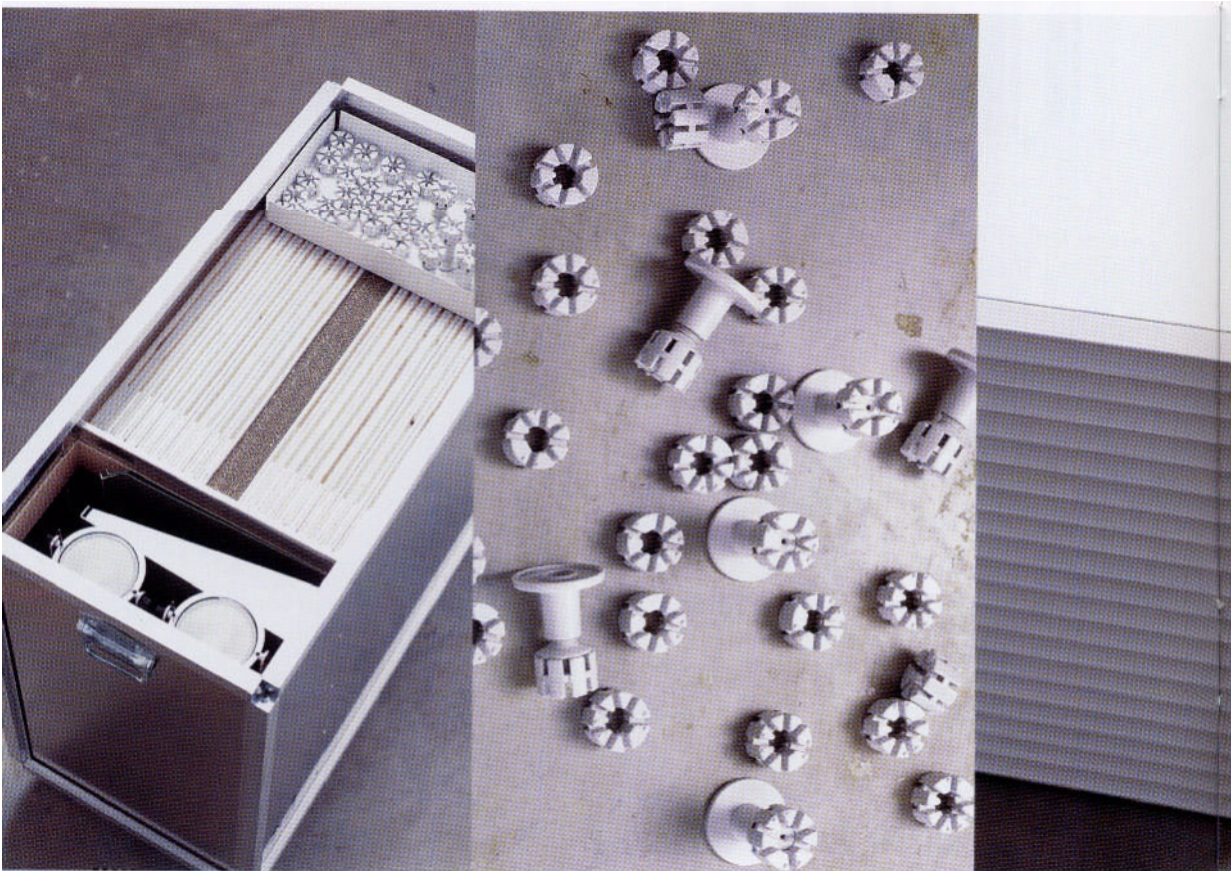

Comprising four bags each containing five lightweight elements: Length 660 mm, width 120 mm, height 660 mm

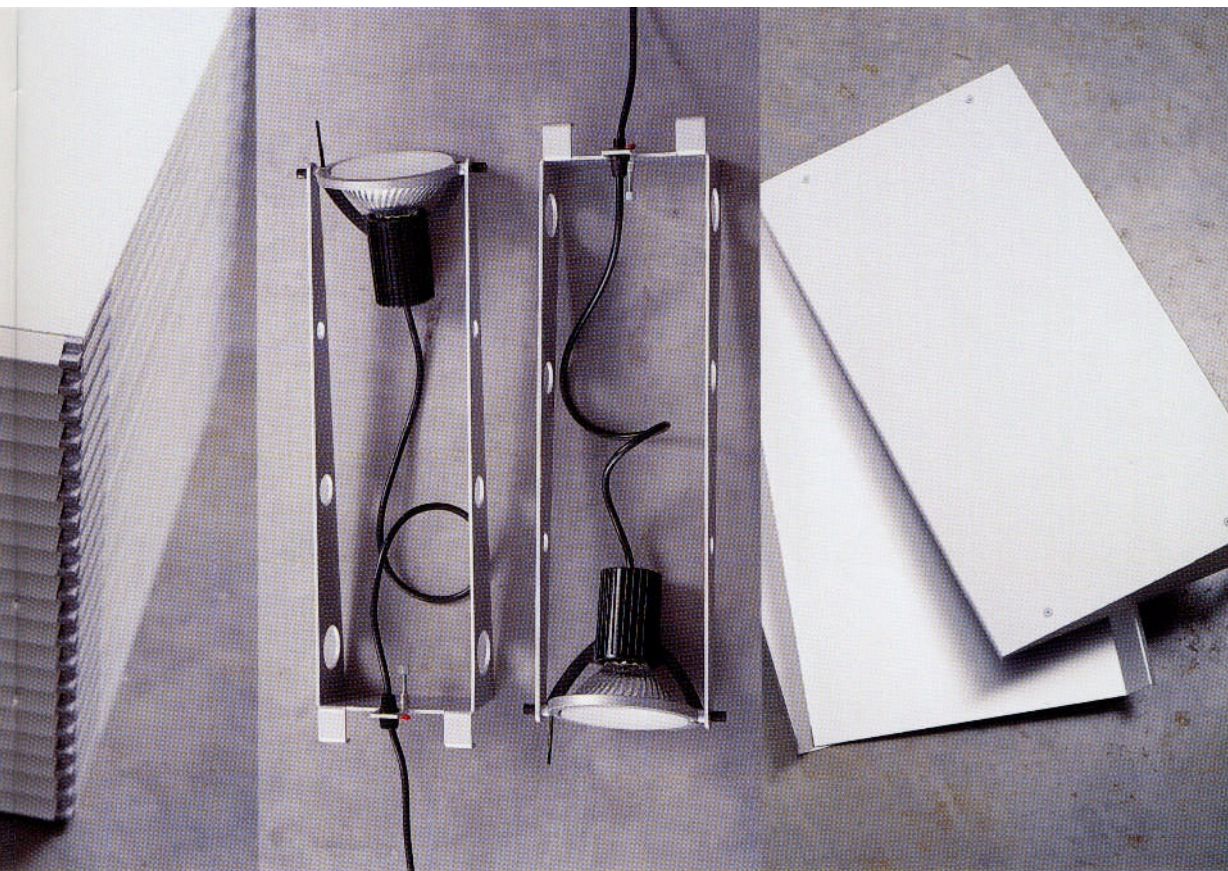

*One bag for accessories:
Length 440 mm, width 200 mm, height 660 mm*

Total weight: 55 kg

If required, we can also supply a collapsible trolley.

L4 System

The contents

Both the case version and the bag version accommodate the maximum range of accessories in a minimum of space.

From top to bottom and on both sides, the L4 wall is a medium for whatever you want to convey information in any way. Hand-outs and exhibits can be placed on the brochure holders and on the shelf. To present everything in the right light, the set includes two adjustable spherical spotlights or two swivel bracket-mounted spotlights.

The 7.6m² wall surface area (20 lightweight panels) is assembled using connectors and height-adjusters without any tools at all.

The set also includes the following items:

- 1 shelf / horizontal,*
- 2 brochure holders / slanted,*
- 2 spherical spotlights / rotating or*
- 2 bracket-mounted spotlights / swivel,*
- 2 three-way power sockets / 4 m,*
- 1 extension cable / 4 m*

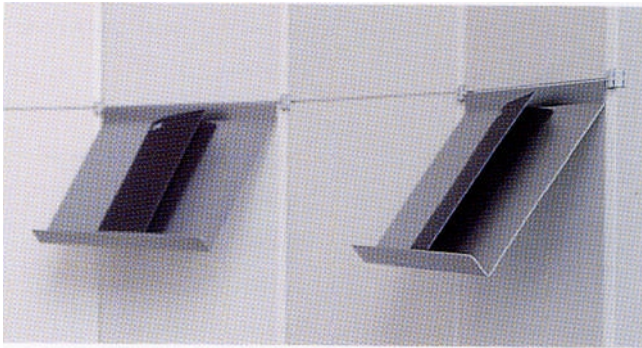

L4 System

Shelf and Brochure Holders

The shelf, which can support a weight of not less than 5 kg, is available for your exhibits, decorations and other items. Depending on your choice of stand set-up, you can integrate the shelf at any position in the wall to make your exhibits into real eye-catchers.

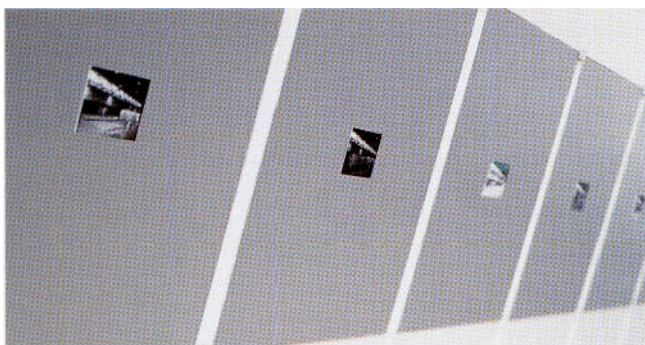

The brochure holders provide additional exhibition space for information material, inviting visitors to leaf through your brochures and spend a little time at the L4 wall.

— Add-on elements for the L4 wall: The platform

The L4 platform can be used to create additional forms of presentation. The different elements can be configured to form a cube, a cuboid or a tower. The panels can, of course, also be integrated into the wall. You can choose between the platform in two bags, the aluminium case for one platform and the aluminium case for two platforms.

The set includes the following elements:

*8 connectors, 4 height adjusters,
3 small-sized and 3 large-sized
lightweight elements,
2 light-metal shelves, 1 frame
with door and 1 lightweight shelf.*

— Graphic panels

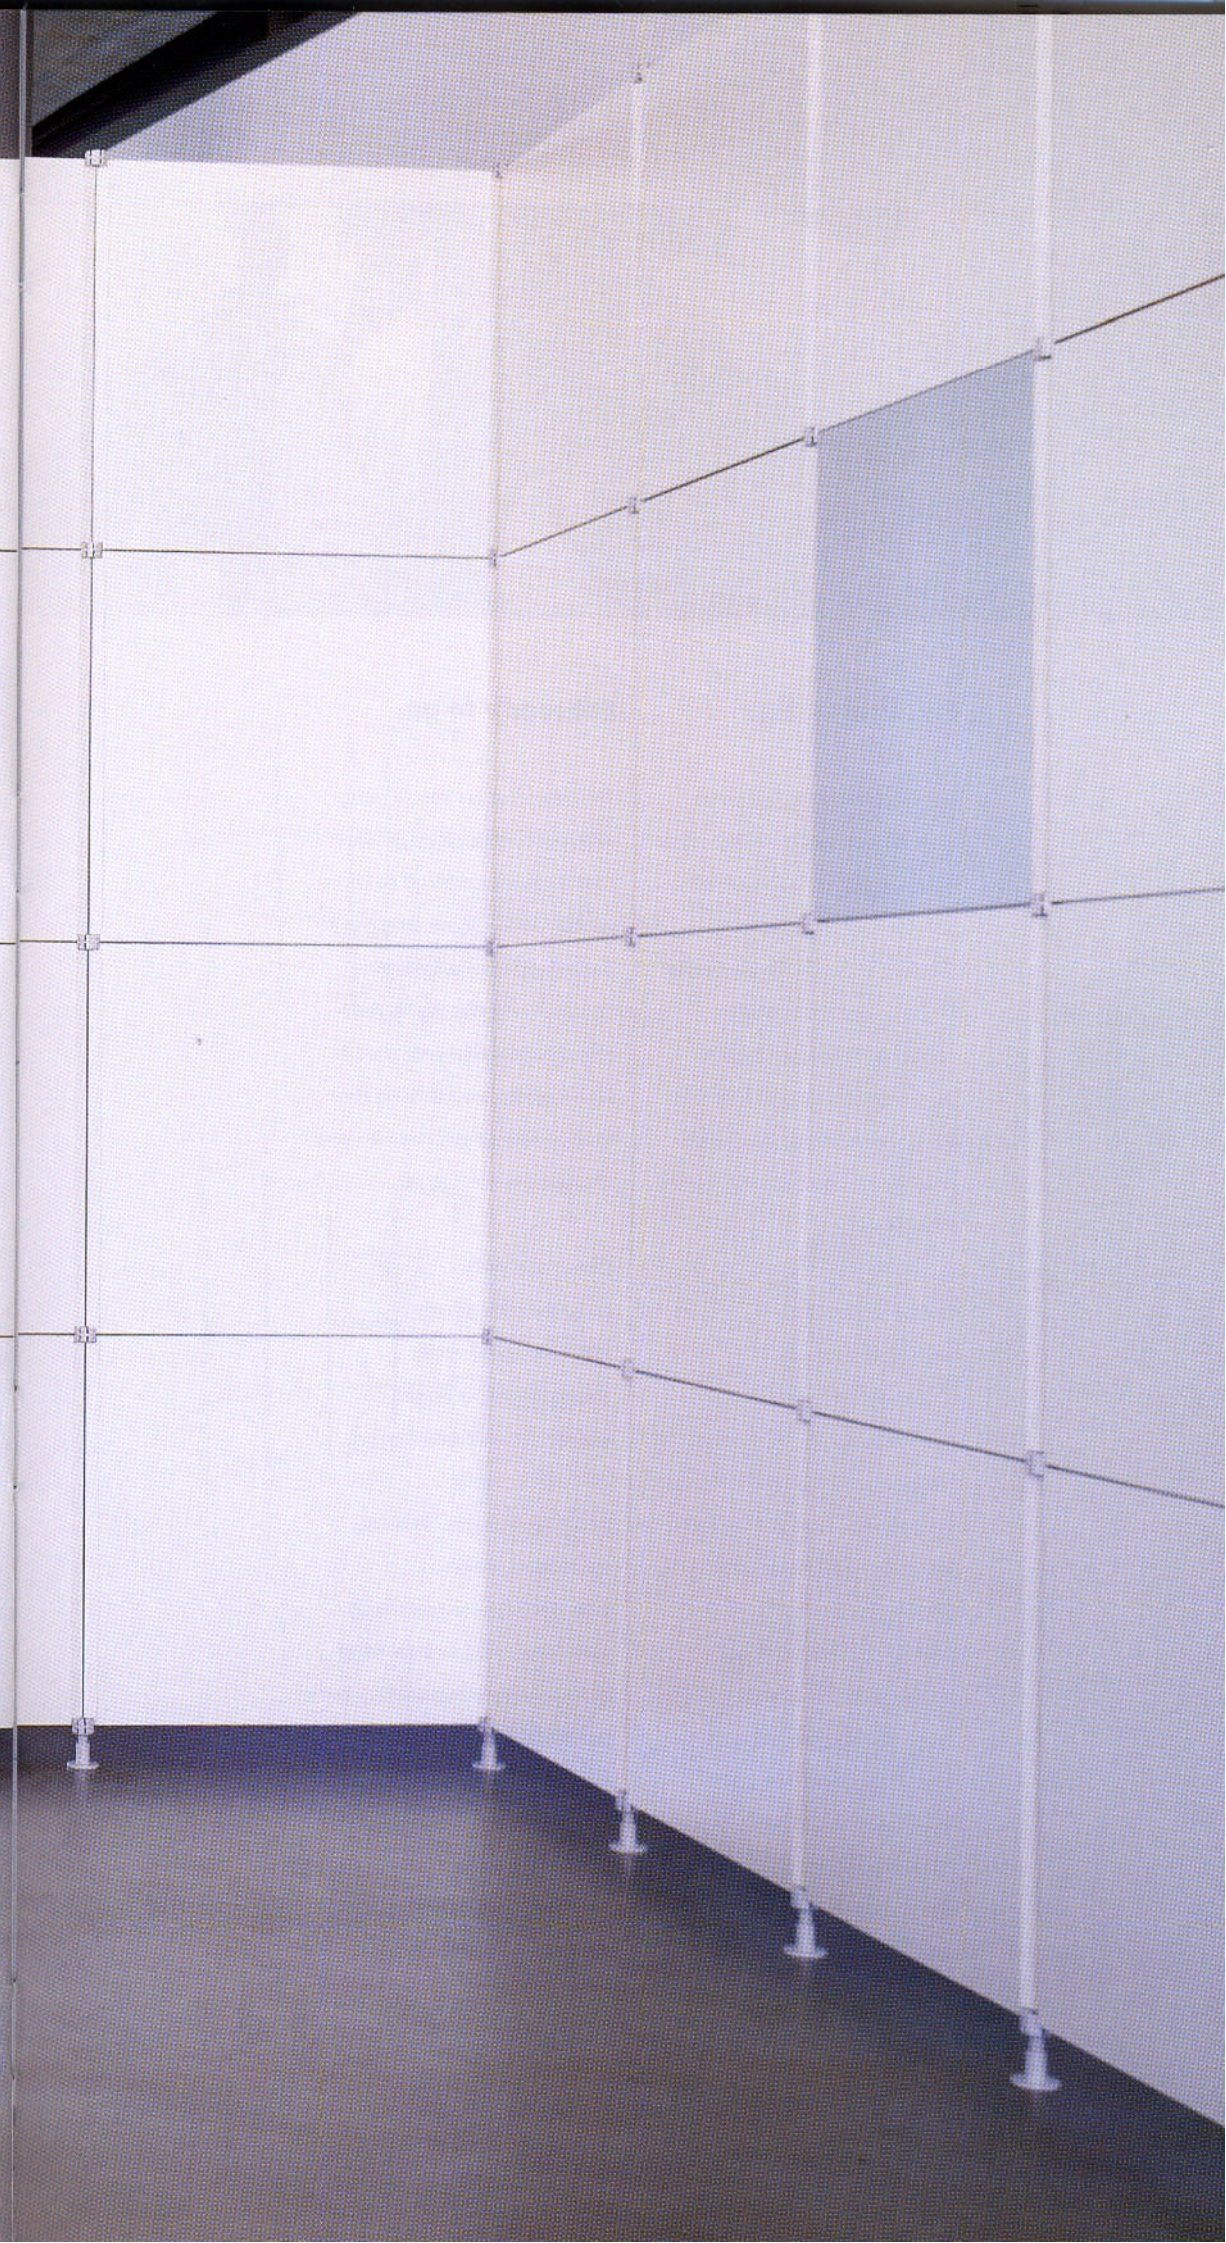

Graphic panels display your product and service information and simplify the rapid replacement of different pictures and information.
